

Maintenance Checklist for Mini Split Heat Pumps

If you have a heat pump, it will need periodic maintenance to keep it running properly and efficiently. Following are general things we can do to perform maintenance on your heat pump.

- Cleaning the indoor and outdoor coils
- Flushing the condensate drains and pans
- Cleaning or replacing the air filters
- Checking for errors and error history
- Testing system in both heating and cooling
- Cleaning the evaporator fan if necessary
- Cleaning the discharge air scoops and air direction blades
- Clean and flush the condensate pumps if necessary

Each point is not necessarily applicable to each individual system. System is evaluated on a case-by-case basis. Any necessary repairs will be billed separately.
